📍 Address:

Berhampur, Odisha

Skills

Front-end Development:

Angular, HTML, CSS, Typescript

Back-end Development:

C#, ASP .NET Core, REST API, Entity Framework, LINQ, SQL Server

Business Data Analytics:

Angular Charts, PowerBI

Unit Testing:

API Unit testing in .Net, Angular Unit Tests and Xamarin Forms Unit Test.

Azure Resources:

App Services, Logic Apps, Azure SQL

Agile:

- Worked in Agile environments, including daily standups, sprint planning, and retrospectives.
- Used Agile methodologies to successfully deliver projects on time and within budget.

Scrum:

- Utilized Scrum to manage project timelines, tasks, and priorities.
- Worked closely with cross-functional teams to ensure successful project completion.
- Improved team productivity by implementing Scrum methodologies.

Academic History

Diploma:

University - State Council For Technical Education & Vocational Training
Collage - Aumsai Institute Of Technical Education
Branch - Mechanical Engineering
Year of passing - 2019 (2016-19)

Graduation:

University - All India Council for Technical Education
College - Roland Institute Of Technology
Branch - Mechanical Engineering
Year of passing - 2022(2019-22)

Project

Human resources management system

An employee management system is a web application designed to help businesses manage their employees efficiently. The system typically includes features such as:
Employee database: A centralized database that stores employee data such as full name, employee ID, company allocation, designation, joining date etc.

Attendance tracking: A system to manage employee attendance, including tracking time in, time out and remarks.

HR dashboard: A dashboard that provides a graphical representation of employee data, including day vs working hours, active and resigning employees, and day vs salary. The dashboard provides managers with a comprehensive view of their workforce, enabling them to make informed decisions about resource allocation, compensation, and retention.

A mobile application developed using Xamarin, the **allowance app** is designed to provide a digital solution for managing employee allowances.

Work Experience

Astoria Technologies Pvt. Ltd.

.NET Full Stack Developer, as an Associate Software Engineer at Astoria Technologies (1 year of experience)

- As an Associate Software Engineer at Astoria Solutions, I leveraged my skills and knowledge in .NET framework to design, develop, and maintain web applications and services. I worked with a cross-functional team of developers, testers, and business analysts, using Agile/Scrum methodologies and Azure DevOps tools to deliver high-quality software solutions for various clients.
- Some of my notable achievements include building efficient **RESTful APIs** that facilitate seamless communication between different systems, crafting visually appealing user interfaces with **Angular** that ensure an optimal user experience, and developing reliable server-side code with **.NET Core** that handles business logic, data processing, and database integration. I also created comprehensive unit tests and performed code reviews to ensure code quality and adherence to standards.
